

## California Wildfire Burn Acreage and Preliminary Estimates of CO<sub>2</sub> Emissions

**Data Source:** California Air Resources Board staff's preliminary estimates using the FOFEM model and CalFire's fire footprints. FOFEM does not model other land types (e.g. agricultural, developed, desert, and other mostly barren lands).

**Data Sources:** Fire footprint information came from California Dept. of Forestry and Fire Protection (CalFire) Fire and Resource Assessment Program (FRAP). Fire Perimeters Version 17\_1 (Filename: fire17\_1.gdb) <http://frap.fire.ca.gov>  
Land cover type information is aggregated from Landfire (a consortium of federal agencies) Fuel Characterization Classification System vegetation cover raster data.
